[ARCHIVED] San Francisco Land Use - 2020

[ARCHIVED] San Francisco Land Use - 2020 Housing and Buildings

This dataset is no longer being updated and has been archived. Please see [Current San Francisco Land Use dataset](#) for most recent data

Summary

Land Use 2020: Land use categories for every parcel in San Francisco. The land use categories are derived from a range of City and commercial databases. Where building square footages were missing from these databases they were derived from a LIDAR survey flown in 2007.

Land use categories are as follows (units are square feet):

- CIE = Cultural, Institutional, Educational
- MED = Medical
- MIPS = Office (Management, Information, Professional Services)
- MIXED = Mixed Uses (Without Residential)
- MIXRES = Mixed Uses (With Residential)
- PDR = Industrial (Production, Distribution, Repair)
- RETAIL/ENT = Retail, Entertainment
- RESIDENT = Residential
- VISITOR = Hotels/Motels
- VACANT = Vacant
- ROW = Right-of-Way
- OPENSOURCE = Open Space

Other attributes are:

- RESUNITS = Residential Units
- BLDGSQFT = Square footage data
- YRBUILT = year built
- TOTAL_USES = Business points from Dun & Bradstreet were spatially aggregated to the closest parcel, and this field is the sum of the square footage fields

The subsequent fields (CIE, MED, MIPS, RETAIL, PDER & VISITOR) were derived using the NAICS codes supplied in the Dun & Bradstreet dataset, and the previous TOTAL_USES column.

PREDOMINANT LAND USES:

- RESIDENTIAL: Housing—from single family to multifamily to high-rise apartment complexes.
- CIE - CULTURAL, INDUSTRIAL, EDUCATIONAL: Any cultural, institutional, medical or educational place such as a museum, zoo, hospital, medical center, college, theatre, social service, or membership organization.
- MIPS (generally for offices): Management, information, and professional activities such as finance, insurance, and real estate (FIRE), business, legal, and public administration.
- RETAIL/ENT (Retail/Entertainment) Shopping and direct consumer services, amusement, recreation and personal services, restaurants and bars – from neighborhood-serving to region-serving.
- PDR (Production/Distribution/Repair): Wholesale trade, showrooms, manufacturing and materials processing, warehousing, repair, businesses, construction, transportation, communications, utilities.
- VISITOR: Hotels and motels. PUBLIC: Publicly owned parks, recreation, and open spaces, as well as some highway right of ways.
- VACANT: An empty or undeveloped lot.
- MIXED USES: Combined uses, such as office and retail, industrial-retail-entertainment, or industrial and office, etc. where no one use predominates.
- MIXEDRES (Residential Mixed): Mostly housing with one or more other use (office, retail, industrial) on the ground floor).

The determining factor for a parcel's LANDUSE is if the square footage of any non-residential use is 80% or more of its total uses. Otherwise it becomes MIXED.

In the case where RESIDENT use has some square footage of non-residential use, this is mainly accessory uses such as home businesses, freelancers, etc.
